Volume 9, Issue VI,

April 2002

April Meeting Details

At our next meeting we will be having open discussion of the future direction of TSMUG. This is a group created by technology users, for technology users, the users need to define the needs of the group today.

Many areas of our community have expressed positive interest in the service our group provides. Our group has existed in its present form for many years. It is time we stop to take a look at the many ways we may better serve the community as a non-profit organization.

There are many reasons to keep the group active with regular meetings. The most basic reason is the forum it provides all of us for sharing experiences and knowledge.

The TriState area now has more AS400 educational programs in schools and colleges than ever before. A user group to help with mentorship programs would benefit our community greatly at this time.

This meeting will follow an agenda that will allow for everyone to voice ideas on the basics of how we operate, what services we will provide and how often we will meet. Any changes to our Regulations will be voted on by members in attendance.

Nominations for TSMUG Board of Directors 2002 - 2003

If you are interested in keeping the TSMUG going, please volunteer to serve as a group board member. The existing organization of group activities will be defined at our April meeting and next years board will have the job of implementing the items decided upon. It is important to remember the purpose of the group is defined by its' participating members. The role and responsibilities of the Board of Directors are designed to change as the group evolves and next year's Board may have different responsibilities.

To volunteer, contact an existing member of the Board of Directors.
